As we get older, our bones can become weaker. Calcium helps keep our bones strong and healthy. It also helps the muscles, the heart, and nerves work the right way. Most people think of milk and cheese when it comes to calcium, but you can still get plenty of calcium with non-dairy options.

**Following are the top non-dairy, calcium-rich foods and ways to prepare them.**

**Leafy Greens**—Vegetables like kale, collard greens, and bok choy are great sources of calcium. You can eat them cooked or raw in salads, soups, or as side dishes.

**Broccoli**—This vegetable is full of vitamins and calcium. Add it raw, steamed, roasted, or boiled to any of your meals as a side dish or a quick snack.

## Non-Dairy Sources of Calcium

**Canned Fish with Bones**—Sardines and canned salmon have soft, edible bones that are high in calcium. You can mash and spread them onto a sandwich, mix them into salad, pasta, or with other ingredients to make patties.

**Beans and Lentils**—Black beans, chickpeas, and lentils are tasty, filling, and full of calcium. You can use them in soups, stews, or salads.

**Nuts and Seeds**—Almonds, chia seeds, and sesame seeds are full of calcium. Try almond butter on toast, or sprinkle chia seeds on yogurt or oatmeal.

**Fortified Drinks**—Look for calcium-fortified plant-based milks like almond, soy, or oat milk. There are also some orange juices that are fortified. Look on the

label for the words “calcium-fortified.”

### Tips when looking for non-dairy options:

**Read Labels** – Look for the words “calcium-fortified.”

**Eat a Variety** – Try different foods each day.

**Talk to Your Doctor** – Ask if you need a calcium supplement.

You don’t need milk or cheese to keep your bones strong. Try other tasty foods and give your body the calcium it needs, the non-dairy way!

### Types of Lentils

# Food Sources of Calcium

Getting enough calcium is important for strong bones and overall health. Eating a variety of nutrient-dense foods from all food groups can help you meet your needs.

## Did you know that you can get calcium from many different food groups?

Here are a few examples:

Low-fat or fat-free milk, yogurt, or kefir, including lactose-free versions and fortified soy milk and yogurt

Vegetables such as nettles, collard greens, nopales, bok choy, and kale

Tofu, canned sardines, and canned salmon with bones

Fortified 100% grapefruit or orange juice

## Looking for more sources of calcium to enjoy?

Use this list to identify foods and drinks that fit your culture and lifestyle. By making shifts toward a healthy eating routine, you can meet your food group and calcium needs.

### Nutrient-dense Food and Beverage Sources of Calcium

FOOD	STANDARD PORTION	CALCIUM (mg)	PLAN TO TRY	MY FAVORITES
<b>Dairy and Fortified Soy Alternatives</b>

Rice beverage (rice milk), unsweetened, fortified	1 cup	283		

**Notes:**

All foods listed are assumed to be in nutrient-dense forms: lean or low-fat and prepared with minimal or no added sugars, saturated fat, and sodium.

Some fortified foods and beverages are included. Other fortified options may exist on the market, but not all fortified foods are nutrient-dense. For example, some foods with added sugars may be fortified and would not be examples in the lists provided here.

Some foods or beverages are not appropriate for all ages, particularly young children for whom some foods could be a choking hazard.

This list includes "standard" portions, which provide at least 130 mg calcium. Portions listed are not necessarily recommended serving sizes.

Seafood varieties include "Best Choices" from the FDA/EPA joint "Advice About Eating Fish" available at [FDA.gov/fishadvice](https://www.fda.gov/fishadvice).

**Data Source:** U.S. Department of Agriculture, Agricultural Research Service. FoodData Central, 2019. [fdc.nal.usda.gov](https://fdc.nal.usda.gov).

## Vegetable—Zucchini

Zucchini is a part of the gourd family, called Cucurbitaceae. It is related to pumpkins, cucumbers, and melons. Even though we cook it like a vegetable, zucchini is actually a fruit because it grows from a flower and has seeds inside.

It originated from Central and South America. Long ago, Native people grew a type of squash that looked like zucchini. Later, Italian farmers started growing the kind of zucchini we eat today. The word “zucchini” is actually Italian.

Zucchini can be enjoyed raw, cooked, fried, baked, stuffed, or even turned into zoodles, which can be used as a pasta substitute. The plants grow big leaves and bright yellow flowers. The flowers are edible, too, and are often fried or stuffed!

Zucchini is full of nutrients that help keep your body healthy. It contains vitamins C and A, potassium, magnesium, and fiber. Zucchini is low in calories and contains a lot of water, so it helps keep you hydrated as well. Zucchini is a healthy, tasty plant that gives your body important vitamins and minerals. Whether raw or cooked, zucchini is great choice for meals or snacks.

## Recipe— Zucchini Brownies

### Ingredients

- 1 1/2 cups granulated sugar
- 1/2 cup avocado oil, canola oil, or vegetable oil
- 2 cups all-purpose flour
- 1/4 cup unsweetened cocoa
- 2 cups shredded zucchini, *don't squeeze out the moisture*
- 2 teaspoons vanilla extract
- 1 teaspoon salt
- 1 1/2 teaspoons baking soda
- 1 1/4 cups semi-sweet chocolate chips, *divided*

---

*Recipe Received From: two peas & their pod*

---

### Instructions

1. Preheat oven to 350 degrees F. Grease an 9×13 baking pan with cooking spray, set aside.
2. In a stand mixer, combine sugar, oil, and flour, combine until mixture resembles wet sand. It will be dry looking and that is ok. While mixing on low, add cocoa, shredded zucchini, vanilla extract, salt and baking soda. Mix until well combined. The mixture will moisten once the zucchini is added. Stir in one cup of the chocolate chips.
3. Pour brownie batter into prepared pan and sprinkle with remaining chocolate chips. Bake for 28-32 minutes or until a toothpick comes out clean and the brownies are set.
4. Cool completely on a wire rack. Cut brownies into squares and serve
