West Virginia Executive Branch
Privacy Tip

October is National Cyber Security Awareness Month!

In recognition of National Cyber Security Month, we are supplying tips to keep you safe in your work life and your "away from work" life also!

Keep a Clean Machine.

- **Keep security software current: Having the latest security software, web browser, and operating system are the best defenses against viruses, malware, and other online threats.**
- **Automate software updates: Many software programs will automatically connect and update to defend against known risks. Turn on automatic updates if that's an available option.**
- **Protect all devices that connect to the Internet: Along with computers, smart phones, gaming systems, and other web-enabled devices also need protection from viruses and malware.**
- **Plug & scan: "USBs" and other external devices can be infected by viruses and malware. Use your security software to scan them.**
