

Steps to **remove** personal protective equipment (PPE)

- 1** Remove waterproof apron and dispose of safely. If the apron is to be reused, place it in a container with disinfectant.

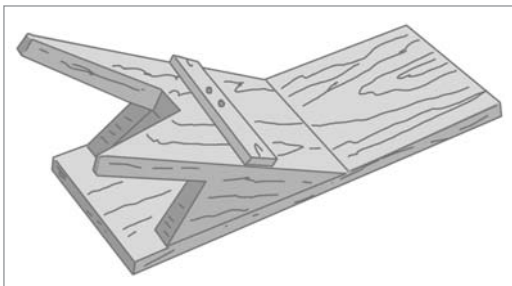

- 2** If wearing overshoes, remove them with your gloves still on (If wearing rubber boots, see step 4).

- 3** Remove gown and gloves and roll inside-out and dispose of safely.

- 4** If wearing rubber boots, remove them (ideally using the boot remover) without touching them with your hands. Place them in a container with disinfectant.

- 5** Perform hand hygiene.

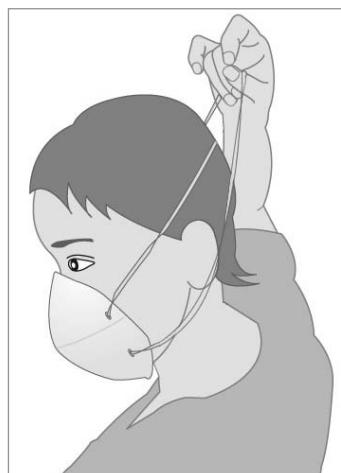

- 6** If wearing a head cover, remove it now (from behind the head).

- 7** Remove face protection:
7a Remove face shield or goggles (from behind the head). Place eye protection in a separate container for reprocessing.

- 7b** Remove mask from behind the head. When removing mask, untie the bottom string first and the top string next.

- 8** Perform hand hygiene.
